## Information regarding Covid-19

In light of the exceptional circumstances surrounding the Coronavirus (Covid-19) public health emergency and the recommendations of the French Government, Plastivaloire Group has decided to gradually close down all of its production sites in France. The Group will liaise with clients to avoid any sudden disruption to deliveries and the supply chain.

These measures aim to protect the health of all employees and to prevent the spread of the virus. How long the closures last will depend on the public health situation and the Government's decisions.

Similar measures have been taken at the Group's European sites, depending on the local health situation and governmental recommendations, and in liaison with clients.

The Group will keep the market informed of any major developments.
